

This book provides practical information on the management of high risk patients presenting for surgery as well as sufficient background information to enable an understanding of the principles and rationale behind their anaesthetic management. The content reflects the needs of a broad readership and presents information not readily available in similar books (e.g. a summary of all CEPOD reports, perioperative renal failure, the role of the cardiology consult and indications for admission to ICU and HDU). The format of each chapter is designed to provide rapid access to important information, with key facts and advice presented concisely. Important references that highlight controversies within a subject, and suggestions for useful further reading are also presented. The book will be useful not only as an aide memoire for the FRCA and other examinations in anaesthesia but also as a useful quick reference for all operating theatre, ICU, CCU and HDU-based personnel.

My Daddy Cooks: 100 Fresh New Recipes for the Whole Family, The Dual Vision: Alfred Schutz and the Myth of Phenomenological Social Science (Routledge Library Editions: Phenomenology), A Thousand Reasons for Loving China, True Tales Of Arctic Heroism In The New World, O Au No Keia: Voices from Hawaii's Mahu and Transgender Communities, Paulus und die Gesinnung Christi: Identitat und Entscheidungsfindung aus der Mitte von 1Kor 1-4 (Bibliotheca Ephemeridum Theologicarum Lovaniensium),

As stated in the introduction, this book has the aim of 'providing practical information on the management of high-risk patients presenting for.

Patients with diminished functional capacity are at increased risk of and inotrope therapy, selection of surgical and anaesthetic personnel of
?Understanding risk - ?framework for -
?Patient factors - ?Biomarkers. This book describes anesthetic and perioperative management in categories of high-risk patient scheduled to undergo elective noncardiac surgery. ANAESTHESIA FOR THE HIGH RISK PATIENT. Edited by. Dr Ian McConachie, Consultant in Anaesthesia & Intensive Care. Blackpool Victoria Hospital.
