

Introduction It is too early, at this date, to record the history of the South African war. We live in an age, however, when interest is ephemeral, and, unless one is content to write for reputation alone, a work must be published during the height of public interest to command success. Thanks to electricity and newspaper enterprise, gifted writers now erect very readable books around the slender fabric of cable despatches. The author who has gathered his material at the risk of life and health, and at great expenditure of energy and money, returns to find his work anticipated by perhaps half a dozen books written by men who have never left the security of their own homes. It is a noteworthy fact that after the Spanish-American war, with perhaps one exception, the most successful books were penned by writers who never were in Cuba. Their works are a comedy of errors from Alpha to Omega, but they were issued when the popular feeling was inflamed with victory, and their accuracy was not questioned. Hence the need of rapid preparation. (Typographical errors above are due to OCR software and do not occur in the book.)
