

With blue ribbon panel discourse and recommendations of more Federal agencies and promoting direct cooperation between existing agencies, this newly released novel by Reed Runk offers a view of futility of such advice. As international peace treaties are being sidestepped and outright dismissed concerning space weaponry by the worlds major powers, the relevance of this book shows through with the use of high tech surveillance and weapons of destruction being placed in strategic locations beyond our atmosphere. With the combination of aspects of colonial history and new views of Native Americans, Runks literary creation is not only relevant and timely but offers some comic relief in a world riddled with war, strife, poverty, and greed. Those who enjoyed Runks first novel, The Platinum Ice Pick, will not be disappointed with this sequels action, drama, and witty dialog which is interlaced with intrigue, mystery, and romantic entanglements of Private Investigator Lewis "Detroit" Symms. Although this books plot is inclusive, fans of the protagonist will be delighted to know his mentor, Tada, returns to explain his disappearance with the exotic Monique. Following strange twists and turns, Pontiacs Revenge guides the reader through a maze of deceit from bungling government officials and their shadow organizations. Lew is taken to some of remotest places on earth thinking that his assignment is to recover precious objects only to find himself embroiled in a cold war which turns hot enough to create World War 3.
